

The Geology/Geophysics Program at St. Mary Land & Exploration Company offers a broad range of experience for M.S. Geo-Science graduates. The program is tailored to the challenges of producing and developing oil and gas in the various basins and formations throughout the continental U.S. From the beginning, you will be mentored by experienced professionals on current projects. The development program offers a broad exposure to all the key aspects of oil and gas exploration and production in today's environment with special emphasis in your core area of Geo-Science. The development program is individualized training, with hands-on experience, specialty schools, as well as the challenges, opportunities and rewards found in the oil and gas industry.

Oil & Gas Geo-Science Discipline

Responsibilities include providing necessary geologic and or geophysics support for development and exploration drilling programs. The support will be designed to maximize hydrocarbon recovery and enhance economic analysis of capital projects.

Geology/Geophysics Training Program*

> Company Orientation	1 WEEK
• Employee Relations	
• Geo-Science Introduction	
• Computer Tools	
> Development Geology Project	16 WEEKS
> Software Training Schools	2 WEEKS
> Geophysics Project	16 WEEKS
> Miscellaneous Geologic Seminars	1 WEEK
> Nautilus Geo-Science Training	1 WEEK
> Exploration Geology Project	16 WEEKS

**1st Year of Employment*
